KEY ACHIEVEMENTS

Developed

A Python-based data processing script to automate repetitive academic tasks, reducing manual work by 50%.

Built

A personal portfolio website using HTML, CSS, and JavaScript, integrated with project showcases to highlight Python and software development skills.

Solved

200+ coding problems on platforms such as HackerRank and Codeforces, improving algorithm design and problem-solving abilities.

Enhanced

Portfolio site visibility by applying basic SEO techniques, making it more discoverable to recruiters and collaborators.

STRENGTHS

Interpersonal Skills

Strong problem-solving abilities, effective communication skills, and adaptability
